Proposal for WordPress eCommerce Website Development

Platform: WordPress

Technology Stack: Elementor / WooCommerce / Custom Plugins (if required)

Project Features

1. User-Friendly Website Interface

- Responsive design (Mobile, Tablet & Desktop compatible)
- Clean and modern UI using Elementor or similar builder

2. Product Management

- Add, edit, and manage unlimited products
- Categories, tags, and filtering options
- Product variation support (size, color, etc.)

3. POS (Point of Sale) Integration

- Real-time stock syncing with online store
- Cash/Card/bKash payment handling
- Printable receipts & invoice system

4. Secure Payment Gateway Integration

- SSL supported
- bKash, Nagad, Rocket, Manual Bank Transfer, or International gateways (PayPal/Stripe) integration

5. Order Management Dashboard

- Track orders, change status, and notify customers
- Admin panel to manage users and inventory

6. Customer Features

- Registration, login, and profile management
- Order history and invoice download
- Wishlist and product review system

7. SEO & Speed Optimization

- On-page SEO setup (Meta tags, schema, sitemap)
- Caching and performance optimization

8. Reports & Analytics

- WooCommerce reports on sales, products & customers
- Google Analytics setup

Project Delivery

Timeline: 3 working days

Project Cost: 25,000/=

Note:

- The above estimate is subject to change based on additional features.
- 50% advance payment is required to start the project.

Let me know if you'd like to proceed!

Best Regards,
Founder & CEO
